Presentations will cover the latest research on:

- the role of evidence in campaigns
- the prevalence of bullying among disabled children and young people (using the [Millennium Cohort Study](#) and [Next Steps](#))
- the scarring effects of childhood bullying on adult mental health and labour market performance (using the [National Child Development Study](#))
- associations between bully victimisation and life satisfaction
- the prevalence of bullying among lesbian, gay, and bisexual young people
- opportunities for future research
