- About CLOSER
- CLOSER Discovery
- Learning Hub
- Harmonisation and data linkage resources

Harmonisation

Facilitating comparisons within and across studies

Why harmonisation matters

- Full potential of the UK studies realised when we compare within and across studies
- Different studies have used different methods to collect information on participants' lives
- Data harmonisation involves recoding or modifying variables so that they are comparable

Harmonisation topics

Height, weight and BMI

Socio-economic status

Use/collection of biological samples

Measures of vision

Childhood environment and adult wellbeing

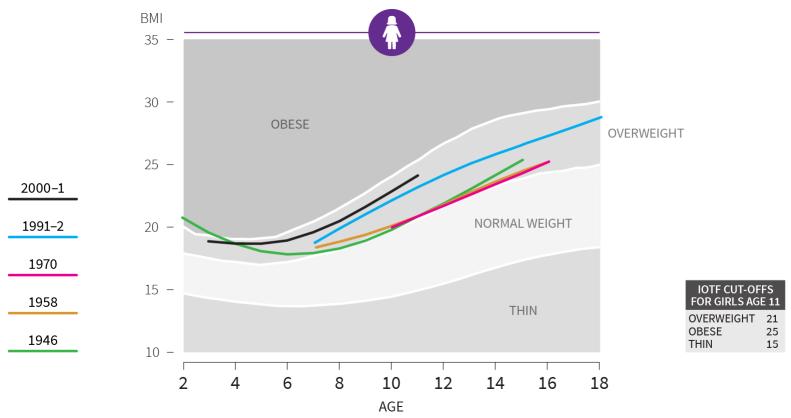

Review of methods for determining pubertal status

Exploiting CLOSER biomarker data

Overcrowding and health

Tracking the rise of obesity in the UK (91st percentile)

Reference

Johnson, W., Li, L., Kuh, D., & Hardy, R. (2015). How Has the Age-Related Process of Overweight or Obesity Development Changed over Time? Co-ordinated Analyses of Individual Participant Data from Five United Kingdom Birth Cohorts. *PLOS Medicine*, e1001828. Contact: Rebecca Hardy rebecca.hardy@ucl.ac.uk

Harmonisation resources

- Harmonised datasets available via UK Data Service, with documentation
- Future outputs drawing out learning from across CLOSER's harmonisation work
- Further harmonisation projects 2017-2019 inc. diet, mental health, cognitive measures
- Training events

Data linkage

Enhancing study data with administrative records

Data linkage

Economic and education data

Geographic data

Hospital Episode Statistics

Data linkage in cohorts and longitudinal studies

Longitudinal analysis of schools

Data linkage resources

- Outputs as part of ongoing data linkage coordination and advocacy
- Schools database
- Dataset linking P14 employment data (HMRC) to birth cohort data
- Training events (eg workshop on linking study data to geographic variables)
